***Specification***

The amendment filed October 31, 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Language added within the paragraph beginning at line 7 of page 15 of the specification. Particularly, the added recitation of "[t]he reinforcing structure can be formed from a variety of materials suitable to increase the load-bearing capacity of the support gasket, including for example, materials which are stronger and/or stiffer than the support gasket. Examples of suitable materials from which the reinforcing structure can be formed include metallic materials such as steel. In general, as represented in FIG. 5C, the reinforcing structure can be formed from a material that is different than a material of which the support gasket is formed."

Applicant is required to cancel the new matter in the reply to this Office Action.

This application is in condition for allowance except for the following formal matters:

See above objection to the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
